SECTION 1057 -- LOW CARBON STEEL FASTENERS

1057.01 -- Description

This specification covers requirements applicable to low-carbon steel standard fasteners, non-headed anchor bolts, and the nuts and washers used with each.

1057.02 -- Material Characteristics

- 1. Bolt threads may be cut or rolled and shall meet the latest ANSI thread tolerances for the specified thread series.
 - 2. All threads shall be full and sound.
- 3. The specified diameter of the bolt shall be taken to mean the overall diameter of the threads.
- 4. The diameter of the shank shall in all cases be not less than the root diameter of the thread.
- 5. Low carbon bolts and nuts shall conform to ASTM A 307 or ASTM F 568.
- 6. Low carbon washers shall conform to ANSI B 18.22.M or ANSI B 18.22.1.
 - 7. Washers used with low carbon bolts may be plain or hardened.
- 8. The Contractor may provide either English or metric bolts in accordance with Table 1058.01.

1057.03 -- Acceptance Requirements

Low carbon steel fasteners will be accepted based on requirements of this Section and sampling and testing requirements in accordance with the NDR *Materials Sampling Guide*.
